

YS Series Digital Timer

Specification parameter table

Product model	YS-720	Product model	YS-3800
Working voltage	24v-240v AC/DC	Working voltage	7V-36V 110V-240V AC/DC
Working temperature	10℃-50℃	Working temperature	-10℃-50℃
The switch capacity	1A	The switch capacity	1A
Protection grade	IP65	Protection grade	IP65
Open time	0.5-10 seconds	Open time	1SEC-99h59min59sec Two-way adjustable
Closing time	0.5 min.- 4.5 min.	Circulation patterns	First open then close or first close then open
Connection method	DIN43650A	single mode	Specify a time to open
		Connection method	DIN43650A

Common working voltage supply:

AC220V~AC240V AC110V AC24V 50/60HZ

DC110V DC24V DC12V

Other voltages can be customized.

Voltage fluctuation range:

AC220V~240V AC 110V -15% ~ +10%

AC24V DC24V DC12V ±10%

Solenoid valve installation:

To ensure that the solenoid valve can function well and improve the lifetime of solenoid valve, we advise to install the solenoid coil vertically and valve horizontally.
